TABLE OF CONTENTS

Fall 2014 Course Listing

3 Guidelines for Achieving Esthetic Outcome with Implants Placed in the Esthetic Zone  
Dr. Ziv Mazor  
September 23, 2014

4 Advances and Innovations in Restorative Dentistry  
Dr. Parag Kachalia  
September 24, 2014

5 Secrets of High Strength Ceramics: How to Avoid Failures of Aesthetic Restorations  
Dr. Christian F.J. Stappert  
September 25, 2014

6 The Aesthetic Advantage: Hands-On Aesthetic Dentistry Continuum  
Dr. Larry Rosenthal  
October 17-18, 2014

7 Osseointegration: State of the Science and Future Challenges  
Various Speakers  
November 7, 2014

8 Incorporating Dental Implants Into Your Practice —  
At the Zimmer Institute Training Facility in Parsippany, New Jersey  
Dr. Ziad Jalbout, Dr. Jason Kim, Dr. Mazen Natour, Dr. Michael Sonick  
November 13-15, 2014

Spring 2015 Course Listing

11 Fall 2015 Clinical Participation Programs

12 Implantology: Surgical and Prosthetic Treatment  
Program Director: Dr. Trevor Bavar  
September 2015-June 2017

13 Advanced Aesthetic Dentistry: An Integrated Approach to Aesthetics and Function  
Program Director: Dr. Jonathan B. Levine  
September 2015-June 2016

14 Full-Mouth Reconstruction: Advanced Principles and Practice for the GP — Implants, Aesthetics and Occlusion  
Program Director: Dr. Dean Vafiadis  
October 2015-June 2016

FROM THE DIRECTOR

The Linhart Continuing Dental Education Program at New York University College of Dentistry is dedicated to providing quality dental education programs to dentists, laboratory technicians and dental auxiliary from around the world. Our programs are conducted in our state-of-the-art facilities and feature outstanding faculty and expert speakers that will teach you the skills that are essential for practicing in today’s environment.

We are pleased to share with you in this catalog our current program offerings beginning September 2014. For our regularly updated course listing, including program descriptions and registration information, please visit our brand new website:

http://dental.nyu.edu/ce

GUIDELINES FOR ACHIEVING ESTHETIC OUTCOME with Implants Placed in the Esthetic Zone

LECTURE SYNOPSIS:
The anterior esthetic zone requires following essential surgical and restorative protocols for achieving esthetic natural appearing teeth. Misplacement of the implant will cause esthetic failure. The presentation will focus on the parameters affecting implant placement in the esthetic zone. Hard and soft tissue preservation methods as well as prosthetic solutions will be discussed. Use of autologous growth factors for soft tissue preservation and regeneration will be covered. The lecture will give an overview of the many clinical applications of PRF in oral and maxillofacial surgery, with a specific interest in the management of soft and hard tissues when using immediate loaded implants. PRF is a regenerative biomaterial and is particularly useful and adapted for the regeneration of soft tissues. Combined with immediate loading protocols, this material can allow to optimize the final aesthetic result and to promote a very natural, predictable and durable aesthetic reconstruction in the anterior areas. Complications and ways of repair will be demonstrated.

COURSE OBJECTIVES:
• Proper protocol for optimal esthetic outcomes
• Management of hard and soft tissue
• PRF and utilization
• Understanding the types of complications and factors affecting implant failures

SPEAKER: Dr. Ziv Mazor — Past President of the Israel Periodontal Society, Former Clinical Instructor, Department of Periodontics, Hadassah School of Dental Medicine in Jerusalem, Israel; Clinical Researcher in Bone Augmentation and Sinus Floor Elevation; Member, American Academy of Periodontology, Academy of Osseointegration and the International Congress for Oral Implantologists; Private Practice Limited to Periodontics and Implant Dentistry in Ra’anana, Israel.

DATE: September 23 (Tuesday) 9:00am – 4:00pm
TUITION: $295 USD
CREDIT HOURS: 6
COURSE TYPE: Lecture

To register, visit us online at http://dental.nyu.edu/ce, email us at dentalcde@nyu.edu or call (212) 998-9757.

Jarett J. Gilbert, MA
Director, Linhart Continuing Dental Education Program

FALL 2014 Course Listing
ADVANCES AND INNOVATIONS in Restorative Dentistry

LECTURE SYNOPSIS:
Over the last few years, numerous advancements have been made in the practice of restorative dentistry; however, still in many ways communication between practitioners and laboratory technicians has essentially remained at a standstill. The days of simply writing shade A2 on a paper laboratory slip are quickly coming to an end as the expectations of our patients are rising. Today, patients tend to have high dental IQs and they expect any restorative work that is completed to blend into their dentition regardless of whether it is being done in that anterior or posterior dentition. Thankfully, the evolution of materials allows these expectations to be met when the dentist and laboratory technician work together as a team. One key to success of the team is proper communication and articulation of the patient’s clinical presentation. This full-day course will navigate through visual, physical and written communication, utilizing traditional modalities as well as incorporation of the latest technologies available. Technologies that will be discussed will include digital photography, shade communication devices, digital laboratory slip, latest impression materials, and digital impression media including iTero, Lava COS, E4D, and CEREC. All of the technologies and techniques discussed will be examined from the perspectives of both the dentist and partner laboratory technician.

COURSE OBJECTIVES:
• Proper digital photography communication — equipment and proper photos
• Utilization of new shade guides, beyond traditional Vitalumin
• Utilization of electronic shade taking devices
• Obtaining and communicating facial landmark records
• Techniques to obtain flawless impressions and bite registration records
• Understanding the pros/cons of today’s impression materials
• Utilization of CAD/CAM technology from a communication aspect
• Understanding the benefits of preparation examination in 3D
• Strategies for more successful and efficient delivery appointments
• Incorporation of basic technology without breaking the bank

DATE: September 24 (Wednesday) 9:00am — 4:00pm
TUITION: $295 USD
CREDIT HOURS: 6
COURSE TYPE: Lecture

SECRETS OF HIGH STRENGTH CERAMICS: How to Avoid Failures of Aesthetic Restorations

LECTURE SYNOPSIS:
Due to high aesthetic demands of patients, dentists are driven to fabricate natural-looking restorations not only for the anterior, but also for the posterior region. Due to their preferred optical and biological properties, all-ceramic materials are assessed to be the ideal prosthetic component to fulfill the requirements of teeth and implant-supported restorations. But ceramics are limited by their brittleness. Apart from the initial strength of a ceramic, the long-term success of ceramic material is related to micro-structural resistance to aging.

New monolithic and high-strength bi-layer structured ceramic materials were introduced to minimize fatigue under mastication and guarantee better long-term fracture resistance. Recently, yttrium-stabilized zirconium oxide is the preferred all-ceramic material for the fabrication of abutments, implant-supported crown and bridge work because of an increased flexural strength. The introduction of new ceramic systems and new implant components requires the knowledge of estimated survival rates and limitations of these materials and methods. Understanding of the preferred clinical application for each ceramic system introduces incredible new opportunities for the dental practitioner and might reduce the individual failure rate dramatically.

COURSE OBJECTIVES:
• Principles of aesthetic rehabilitation with ceramic materials
• Clinical survival rates of ceramic restorations — where to use which ceramic
• Case presentations of veneers, partial coverage and full crown restorations
• How to avoid chipping and early failure

DATE: September 25 (Thursday) 9:00am — 4:00pm
TUITION: $295 USD
CREDIT HOURS: 6
COURSE TYPE: Lecture

SPEAKER: Dr. Christian F.J. Stappert — Professor and Director of Implant Periodontal Prosthodontics at the Department of Periodontics at the University of Maryland, School of Dentistry. He served several years as Director of Aesthetics and Periodontal Prosthodontics at the Department of Periodontology & Implant Dentistry associated with the Department of Biomaterials & Biomimetics at New York University College of Dentistry. He earned a D.D.S. and his doctorate from the Johannes-Gutenberg-University Mainz, Germany. Dr. Stappert is a board-certified Prosthodontist in Germany and remains Associate Professor of the Department of Prosthodontics at the Albert-Ludwigs-University Freiburg, Germany. He is cross-trained in Periodontal and Implant Surgery and graduated ‘Master of Science – Biomaterials and Biomimetics’ at New York University. His research interests involve the reliability of dental materials and clinical restorations, as well as tissue management and peri-implant interface. Dr. Stappert is the author of book chapters and several peer reviewed publications. He is editorial board member and reviewer of numerous scientific dental journals and has presented his work at national and international conferences.

SPEAKER: Dr. Parag Kachalia — Vice-Chair of Simulation, Technology and Research and is a team leader within the University of the Pacific’s prestigious complex and aesthetic rehabilitation program. He is a fellow of the American Dental Education Association’s Leadership Institute, researcher, as well as a published author in the areas of dental technology, digital diagnostics, contemporary fixed prosthodontics, and financial management. He has lectured internationally in the areas of aesthetic dentistry, cosmetic dentistry, photography, CAD/CAM technology, fixed prosthodontics, treatment planning and erosion, and diagnostic technologies. Dr. Kachalia acts as consultant for many dental materials/dental technology companies and helps guide product development. Dr. Kachalia is a member of the Pride Technology Leadership Council and is frequently interviewed in regards to his vision of dentistry’s future. Throughout his time in academia he has maintained a private practice geared toward restorative dentistry with his wife and fellow Pacific alum Dr. Charity Duncan. He believes his continual involvement in providing patient care as well as a role in academia has given him a unique balance that allows him to blend the best of both worlds.
THE AESTHETIC ADVANTAGE:

Hands-On Aesthetic Dentistry Continuum

COURSE SYNOPSIS:
This program offers you two options — Participants can take advantage of this unique opportunity to participate in the clinic hands on with a patient or choose to observe over-the-shoulder without a patient up to 15 LIVE anterior aesthetic cases being prepped and temporized in the first weekend and inserted the following month. This 4-day power packed program will focus on comprehensive aesthetic and is designed to expand your knowledge of comprehensive aesthetic cases through lectures, live demonstrations and clinical participation.

Throughout our lecture series, participating doctors are able to listen to lectures on prep techniques step by step, smile design principles, impression & cementation techniques, patient management, treatment planning, material selection, lab communication for a more predictable result and manage your patients effectively. Don’t miss this opportunity to get a head start in developing your aesthetic dentistry practice!

In November 2002, New York University officially dedicated the Rosenthal Institute for Aesthetic Dentistry, an 8,500 square feet dental facility, in honor of Dr. Larry Rosenthal because of his commitment and focus on teaching continue dental education courses devoted to the art and science of aesthetic dentistry.

Course continues on to Level II and level III and may be taken consecutively save $500.00 may be taken one weekend as well for $2,000 USD (one weekend) Early enrollment save $500 or call (212) 998-9757

COURSE OBJECTIVES:
• Preparation Techniques and Principles of Smile Design
• Temporization Occlusal Side Simplified
• Review of Material Selection
• Patient Management and Case Presentation
• Occlusion for Function

• Cementation Techniques Simplified
• Review of Cases with Periodontal and Aesthetics Combined
• Review of Combination Cases Involving Implants
• Lab Communication for a More Predictable Result
• Marketing and Practice Management

PROGRAM DIRECTOR: Dr. Larry Rosenthal — is a New York based dentist who has built an international reputation for his expertise in aesthetic dentistry. Dr. Rosenthal has a passion for sharing his knowledge and innovative techniques through lectures and demonstrations to dentists around the world. He is an accredited member of the American Academy of Cosmetic Dentistry and is the Founder and Program Director for the Aesthetic Advantage hands-On Continuum. He is a Board member and advisor to numerous companies and professional organizations as well as a contributor to numerous academic journals and mainstream dental publications. Dr. Rosenthal is an alumnus of New York University College of Dentistry.

In November 2002, New York University officially dedicated the Rosenthal Institute for Aesthetic Dentistry, an 8,500 square feet dental facility, in honor of Dr. Larry Rosenthal because of his commitment and focus on teaching continuing dental education courses devoted to the art and science of aesthetic dentistry.

New Graduate “Head Start” Observe Program Over the Shoulder Tuition: $1,495 USD
As a young, newly licensed dentist we are offering you the opportunity to jump start your career and immerse yourself in the exciting and rewarding aspect of aesthetic dentistry early on. Learn from the experts and listen to lectures on prep design, how to work with laboratories for a more predictable result, and how to present cases and manage your patients effectively. Don’t miss this opportunity to get a head start in developing your aesthetic dentistry practice!

For more information on the Aesthetic Advantage Over the Shoulder or Hands-On Aesthetic Continuum, please reference the website at www.aestheticadvantage.com or to register, contact Jackie Pastore at 212-794-3552 or aestheticadvantage@ra-grp.com or nparlato@aol.com

THE 25TH ANNUAL NYU/ICOI IMPLANT SYMPOSIUM —

Osteointegration: State of the Science and Future Challenges

Now in its 25th successful year! Learn from the experts in clinical practice in research! Come listen to world renowned speakers lecture from their perspective the state of science and future challenges in dental implantology.

AGENDA

MORNING MODERATOR: Dr. Peter M. Loomer
CLINICAL PROFESSOR & CHAIR, ASHMAN DEPARTMENT OF PERIODONTAL & IMPLANT DENTISTRY

8:00 am – 8:30 am REGISTRATION/COFFEE/EXHIBITS
8:30 am – 8:45 am WELCOME AND INTRODUCTIONS
DR. PETER M. LOOMER & DR. KENNETH W.M. JUDY
8:45 am – 9:50 am "MANAGING THE PERI-IMPLANT TRANSMUCOSAL CONTOUR. BIOLOGICAL AND RESTORATIVE ASPECTS"
DR. STAVROS PELLEKANOS
9:50 am – 10:55 am "IMMEDIATE FUNCTION IN IMPLANT DENTISTRY: OSEEOINCORPORATION WITH TRABECULAR METAL"
DR. MONISH BHOLA
10:55 am – 12:00 pm "OSSSEOINTEGRATION: STATE OF THE SCIENCE AND FUTURE CHALLENGES"
DR. BURTON LANGER
12:00 pm – 12:10 pm Q & A
12:10 pm – 1:40 pm LUNCH/EXHIBITS

AFTERNOON MODERATOR: Dr. Kenneth W.M. Judy
CO-FOUNDER & CO-CHAIRMAN, INTERNATIONAL CONGRESS OF ORAL IMPLANTOLOGY

1:40 pm – 2:45 pm "BIOLOGIC STABILITY THROUGH ENHANCED DENTAL IMPLANT DESIGN AND SURFACE TECHNOLOGY"
DR. CARY A. SHAPOFF
2:45 pm – 3:50 pm "SHORTENED IMPLANT TREATMENT PROTOCOLS: STATE OF THE SCIENCE AND CHALLENGES"
DR. MARCUS ABDOOD
3:50 pm – 4:00 pm Q & A

DATE: November 7 (Friday)
TUITION: Early Registration Discount $275 USD (Before October 15th), $325 USD (After October 15th), $375 USD (ICOI Members)
CREDIT HOURS: 6
COURSE TYPE: Symposium

INCORPORATING DENTAL IMPLANTS INTO YOUR PRACTICE
at the Zimmer Institute Training Facility in Parsippany, New Jersey

LECTURE SYNOPSIS:
New York University College of Dentistry and the Zimmer Dental Institute partner to bring to you this extraordinary learning experience! With the knowledge and expertise of NYU Instructors along with the “state-of-the-art” facilities at the multi-million dollar Zimmer Institute in Parsippany, New Jersey, you will receive the knowledge, skills and confidence that are essential to a successful implant practice.

The simulated surgical and restorative mannequins are the nearest thing to working on an actual human patient as it gets. The mannequins have teeth that can be extracted, tissues that can be sutured, periosteum, sinuses, cortical and cancellous bone, as well as mandibles with a blood supply and innervations, providing you with an exceptional sense of clinical realism.

This comprehensive three-day program is designed to provide you with lectures and hands-on instruction on simulated-patient mannequins. Each learning station is equipped with a computer for accessing reference materials and has all simulated patient materials, including: radiographs, CT scans, and models that are specific for the exercises. The mannequins feature soft tissue and “bone” that have cortical and cancellous layers, soft tissue-lined sinuses and “wired” inferior alveolar nerves. The mannequins are designed to provide participants with a sense of treating a live patient.

SPEAKERS:
Dr. Ziad Jalbout Dr. Mazen Natour
Dr. Jason Kim Dr. Michael Sonick

DATE: November 13 (Thursday) – November 15 (Saturday)
TUITION: $2,000 USD
CREDIT HOURS: 24

2015 Clinical Participation

We Teach Success in Clinical Dentistry

Hands-on Patient Treatment
Experienced & Dedicated Faculty
State-of-the-Art Facilities

For over 20 years the Linhart Continuing Dental Education Program at New York University College of Dentistry has provided hands-on training to dentists in a clinical setting. Our Clinical Participation Programs are unique in that you will treat patients under the direction of dedicated and experienced faculty in our state-of-the-art facilities. These part-time, long-term programs are specifically designed to help you enhance your clinical skills, learn the newest techniques and expand your knowledge in your desired area of interest: Implant Dentistry, Aesthetic Dentistry, and/or Full-Mouth Reconstruction.

At the Linhart Continuing Dental Education Program, we have the resources, expertise and experience to help you build your practice and your future!

HERE’S WHAT A FEW SUCCESSFUL DENTISTS HAVE HAD TO SAY:

“"I made a decision about 3 years ago to participate in a continuing education program at NYU. The goal was to improve my skill set. What I received was a world-class education. The dedication from the entire staff (doctors, auxiliary, and administrative personnel) places this organization at the pinnacle of dental continuing education. I enjoy an ongoing relationship with some of the doctors and several of the other participants. The benefits of that program continue to enhance my professional life today.”
— Dr. Larry Maluskey, Chicago, IL

“This unique program has helped me advance as a clinician and expand my practice.”
— Dr. John F. Como, New Rochelle, NY

IMPLANTOLOGY:
Surgical and Prosthetic Treatment

Enhance your skills in extraction, guided bone and soft tissue regeneration, and implant placement to support many types of fixture-assisted dental restorations, including screw-retained and cemented, fixed, and removable restorations. Learn to photograph and properly document cases. In addition to clinical treatment, you will attend group study sessions where you will observe and present case evaluations, as well as be exposed to didactic lectures presented by seasoned clinicians who are on the cutting edge of implant surgery and restorations. You will have the opportunity to bring cases from your private office for review and discussion. This program is clinically oriented and focuses upon treatment planning. This is not a lecture course. General lectures are included to supplement your knowledge.

However, participants are expected to understand the academic aspects of implant dentistry prior to enrollment. The goal of this course is to provide you with a basic skill set in a unique setting, which will ultimately be a means of increasing production in your private office.

ARE PATIENTS PROVIDED?
Yes. The NYU Linhart Continuing Dental Education Program will provide four (4) patients for each participant for both surgical and prosthetic dental implant treatment.

WHAT IS THE LENGTH OF THE PROGRAM?
The program is two (2) years from September 2015-2016. Additionally, clinic sessions are scheduled during the summer months for patient emergencies and additional clinic time for participants if necessary.

WHAT ARE THE COURSE HOURS?
There are five (5) sections of thirteen (13) participants across Monday, Wednesday and Thursday.

COURSE REQUIREMENTS
Participants must meet all patient treatment care issues including legal record keeping requirements as determined by New York University College of Dentistry. Participants must achieve at least a 95% attendance record in both clinic and lecture sessions over the one-year program.

CREDIT HOURS
200 annually. New York University College of Dentistry is an ADA/CERP recognized provider.

NEW YORK STATE DENTAL LICENSE
All clinical participants are required to obtain a New York State dental license in order to treat clinic patients in New York State. Contact the Linhart Continuing Dental Education Program at New York University College of Dentistry for further details on the application process if necessary.

WHAT IS THE COST OF THE PROGRAM?
For the 2015-2016 academic year for the program beginning in September 2015, the registration fee is $15,950 annually ($31,900 over the two-year program). For the program beginning in September 2015, the payment schedule is as follows:

First Payment $4,700 Due June 1, 2015
Second Payment $4,600 Due December 1, 2015
Third Payment $4,600 Due March 1, 2016

Additionally, for first-year students there is a one-time non-refundable clinic registration fee of $550 due within two (2) weeks of acceptance into the program. This clinic registration fee includes laboratory cost rental and disposable clinical supplies over the two-year period.

WHAT SUPPLIES ARE PROVIDED BY PARTICIPANTS?
Participants are required to purchase the course textbook: Contemporary Implant Dentistry — 3rd edition published by Mosby and authored by Carl E. Misch (approximately $175). Participants are also required to supply a laptop computer and digital camera for case presentations.

This course satisfies the continuing education hours requirement for Fellowship, Mastership, and/or Diplomate status in the ICO.

ADVANCED AESTHETIC DENTISTRY:
An Integrated Approach to Aesthetics and Function

The goal of this course is to train dentists to see and think in a scientific and predictable approach to aesthetic dentistry. Using a time tested methodology, the Advanced Aesthetics course centers around a thoughtful approach to diagnosis, using a 3-step analysis. Fundamentals of aesthetics are studied and put into clinical practice with a methodical approach that drives predictability. Didactic and clinical participation emphasizes prosthodontics, occlusion, periodontics, orthodontics and implantology in a multi-disciplinary approach. Clinical training will cover indirect bonded ceramics and traditional crown and bridge and implant restorations. Aesthetic dentistry techniques of
free-hand bonding, tooth whitening, and the role of occlusion to create beautiful functional restorations will be stressed. The participant will also become aware of the skills necessary to build a successful aesthetic dentistry practice. Leadership skills, communication skills, and management skills will be stressed to be able to build success in one’s career. By the conclusion of this course, the goal is for the participant to be able to comprehensively diagnose, formulate and execute a treatment plan in aesthetic dentistry, along with developing strong clinical skills for case documentation and presentation.

WHAT ARE THE COURSE HOURS?

The program is one (1) year from September 2015-2016 with the option to return for a second year. The course hours are as follows:

WHAT IS THE COST OF THE PROGRAM?

For the 2015-2016 academic year beginning in September 2015, the registration fee is $12,700. A payment plan is available:

<table>
<thead>
<tr>
<th>Payment Period</th>
<th>Amount</th>
<th>Due Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Payment</td>
<td>$4,900</td>

</tbody>
</table>

There is a one-time non-refundable clinic registration fee of $450 due within two (2) weeks of acceptance into the program.

WHAT SUPPLIES ARE PROVIDED BY PARTICIPANTS?

Participants are required to supply a laptop computer and digital camera for case presentations.

CREDIT HOURS

20. New York University College of Dentistry is an ADA/CERP recognized provider.

NEW YORK STATE DENTAL LICENSE

All clinical participants are required to obtain a New York State dental license in order to treat clinical patients in New York State. Contact the Linhart Continuing Dental Education Program at New York University College of Dentistry for further details on the application process if necessary.

WHAT IS THE LENGTH OF THE PROGRAM?

The program is one (1) year from September 2015-2016. Additionally, clinic sessions are scheduled during the summer months for patient emergencies and additional clinic time for participants if necessary. The course hours are as follows:

WHAT ARE THE COURSE HOURS?

TUESDAYS:
8:00 am – 8:45 am Literature Review & Case Presentations
9:00 am – 12:00 pm Clinic
1:00 pm – 3:30 pm Lecture

FRIDAYS:
9:30 am – 1:00 pm Clinic and/or Lecture
1:30 pm – 3:00 pm Clinic and/or Lecture

ARE PATIENTS PROVIDED?

Yes. The NYUVD Linhart Continuing Dental Education Program provides patients; however, participants are strongly encouraged to recruit patients suitable for aesthetic treatment.

ARE PARTICIPANTS REQUIRED TO SUPPLY SUPPLIES?

Participants are required to supply a laptop computer and digital camera for case presentations.

FULL-MOUTH RECONSTRUCTION:
Advanced Principles and Practice for the GP – Implants, Aesthetics and Occlusion

Learn to diagnose, treat, and manage difficult conventional and implant-supported full-mouth reconstruction cases. Refine your clinical skills and theoretical knowledge in all facets of prosthodontics. Understand the rationale of articulation and occlusion-driven diagnosis and treatment planning in fixed, removable, and implant prostheses. Learn provisional restoration, communication, and photography, as they set up any case for success. Restore different types of ceramic restorations with leaders in dental technology. Using computer-aided designs and CAD/CAM technologies, we can create aesthetic long-term prosthetics with a sound occlusion. Advanced education on materials, TMJ, aesthetic, and implant dentistry will also be demonstrated. Participants will work closely with teaching faculty and master dental technicians to enhance a team approach to full-mouth reconstruction from a prosthodontic perspective.

NEW YORK STATE DENTAL LICENSE

All clinical participants are required to obtain a New York State dental license in order to treat clinical patients in New York State. Contact the Linhart Continuing Dental Education Program at New York University College of Dentistry for further details on the application process if necessary.

WHAT IS THE LENGTH OF THE PROGRAM?

For the 2015-2016 academic year beginning in September 2015, the registration fee is $12,700. A payment plan is available:

To register, visit us online at http://dental.nyu.edu/ce, email us at dentalce@nyu.edu or call (212) 998-9757.
GENERAL INFORMATION

Course Information
Unless otherwise indicated, all courses are held at:
NYU College of Dentistry
345 East 24th Street (Corner of 1st Avenue), New York, NY 10010

Registration
Online registration is preferred:
Please visit http://dental.nyu.edu/ce/registration.html

If you do not have access to a computer, you may call (212) 998-9757 to register over the phone.

If you prefer to fax your registration, please fax a copy of the registration from to (212) 995-4081.

If you are paying by check, please note that your confirmation letter will not be processed until payment is received. Please make your check payable to “NYU CDE” and mail your payment to:

New York University College of Dentistry
Linhart Continuing Education Program
345 East 24th Street, New York, NY 10010-4086

Tax Deduction
The IRS may allow an income tax deduction for continuing education course expenses when course content is designed to maintain or improve skills required for an individual’s business. Deduction expenses include registration fees, cost of travel, meals and lodging. Please contact your accountant for further questions.

Cancellation & Refund Policy
Refunds are generally granted only if written notification is received seven (7) business days prior to a given course. NYUCDE cannot be responsible for the refund of any part of the tuition as a result of emergencies, unforeseen circumstances, or events beyond our control.

Dental School Policy
CDE courses do not necessarily reflect the philosophies of the pre-doctoral or postdoctoral training programs. Sponsorship of a continuing education course by NYUCD does not imply subject matter, product or technique endorsement. Courses may include subject of experimental and/or controversial nature. This material is offered to the profession for education and informational purposes in a spirit of academic freedom. NYUCDE reserves the right to modify or cancel any course when deemed necessary. In the event a course is canceled or has reached a maximum enrollment when a registration is received, every attempt will be made to notify registrants and a full refund will be issued. NYUCDE accepts no responsibility for travel expenses or penalties incurred by course registrants in the event of a course cancellation or modification.

Weather Emergencies
On rare occasion, inclement weather will necessitate cancellation or programs for that day only. If the College is closed, you may find this information on the main Dental website (http://dental.nyu.edu/) and our phone bulletin (212-995-3800).

Parking
If you drive your car, the following public parking garages are conveniently located near NYUCD:
• 401 Second Avenue (between East 23rd and 24th Streets)
• 318-322 East 23rd Street (between 1st and 2nd Avenues)
• 300 East 24th Street (between 1st and 2nd Avenues)

Clinic Patients
For courses involving clinical participants, patients are provided by NYUCD unless otherwise noted in the course description, or confirmation letter. If participants would prefer to provide their own patients, this is generally acceptable. However, all patients accepted for treatment must be registered as patient of school and will be charged fee for treatment.

Hotel Accommodations
For more information please visit our website at http://dental.nyu.edu/ce/facilities.html

Recognition and Membership
New York University College of Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ada.org/cerp.

The formal continuing dental education programs of New York University College of Dentistry are accepted by the AADP for Fellowship, Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or ADE endorsement.

New York University is a member of the Association for Continuing Dental Education. The ACDE is the organization of continuing dental education providers associated with dental schools in the United States, Canada and Puerto Rico.
