Online Course (Dentists and Team): 4 CE hours

 ABOUT THE PROGRAM

Invision® Fundamentals is a two-part introductory program for new Invision GP providers. This program is designed to provide dentists and their teams with the essential education and tools needed to start treating patients with Invision. Invision Fundamentals is comprised of two parts- a Live Course focused on clinical education and hands-on training and Online Training modules designed to cover all the basics needed to start an Invision case.

Invision Fundamentals Live Course Overview:
Designed for dentists and their teams, this exciting, in-person half-day course provides participants with the clinical and operational training necessary to begin treating a broad range of patients with Invision.

Included is a separate session exclusively for team members, covering relevant case submission topics and providing attendees practical hands-on experience. It is highly recommended that all key team members attend this program, especially hygienists, assistants and treatment coordinators. This course features active and engaging instruction to foster efficient workflow and synergy for integrating Invision into the practice. All attendees will receive 4 Invision CE hours.

Invision Fundamentals Online Training Overview:
Invision Fundamentals Online Training includes an online orientation designed to prepare doctors and team members to get the most out of the Invision Fundamentals Live Course. It also includes online resources to be used after attending the Live course that cover essential information and procedures to efficiently and effectively incorporate Invision into the practice. This online content is designed to help doctors and team members understand all aspects of the Invision treatment process and is intended to be used as a handy reference tool when treating patients. The doctor and team members will earn 4 Invision CE hours upon successful completion of a short quiz at the end of this training.

EDUCATIONAL OBJECTIVES

At the conclusion of the program the participants will understand how to:
• Identify ideal case types for Invision treatments
• Integrate all aspects of the Invision process into the practice
• Use the software that depicts a virtual set up of your planned treatment
• Find help and resources for additional information and training

To Be Determined
