Each step of endodontically treating and restoring a tooth is connected. This course walks through each step of root canal therapy – with each building on the success of the previous phase. From diagnostic protocol through coronal restoration, learn techniques for clinical success at every step needed to take the patient out of pain, restore function to the tooth while maintaining the proper aesthetic, and enhance long term success.

Learning Modules:
- Diagnosis and Treatment Planning
  A complete understanding of the factors of each case
- Endodontic Access
  Creating a proper access cavity is critical
- Antibacterial Dressings
  Inter-appointment medicaments and temporizing teeth
- Shaping Utilizing the Most Advanced File Technology
  Choices for imparting an appropriate shape to the canal
- Irrigation
  Importance of removal of infection-causing bacteria
- Obturation
  Pros and cons of sealers and obturation techniques
- Coronal Restoration of the Endodontically Treated Tooth
  Choosing between direct vs. indirect restoration
