

EVERYONE onsite MUST complete a Binx saliva test either on Monday, Dec. 14th or on Tuesday, Dec. 15th. And then ...

If you'll be onsite **between DECEMBER 24th and JAN 3rd, or if you're scheduled to return to the building during the **week of JANUARY 4th** (and you **HAVEN'T** traveled to a **restricted state***):**

**see p.2 if you'll be traveling to a restricted state*

You must submit another **TWO NEGATIVE PCR TESTS: One taken WITHIN 7 DAYS of your return to the building, and one taken onsite, either on Monday, Jan. 4th or on Tuesday, Jan 5th**

Binx saliva tests will need to be conducted **FROM HOME**** and mailed in **DURING WINTER RECESS** at the end of December. So ...**

HOW are we going to do that?

Starting Monday, Dec. 14th:

Binx saliva test kits along with mailing labels will be available to pick up in the Schwartz lobby (and will remain available through Dec. 23rd). And ...

To access the building between Dec. 24th and Jan. 3rd, AND/OR to RETURN on (or during the week of) JAN. 4th

Your Binx saliva test **MUST** be conducted on either Dec. 26th or 27th — and you'll need to mail it **IMMEDIATELY** to ensure that it can be analyzed in time for you to be cleared to enter the building (provided results are negative, of course).

And then **EVERYONE** scheduled to be **ONSITE** during the **week of Jan. 4th** **MUST** be tested again **ONSITE** on either **Monday, Jan. 4th** or **Tuesday, Jan. 5th**.

BUT, if you've traveled to a restricted state ...

(If at all possible, please avoid traveling to a restricted state!)

1

First, per the instructions above, you must complete the Binx saliva test from home on either Dec. 26th or Dec. 27th and mail it in immediately.

2

Then, since quarantining rules haven't changed, 72 hours before you leave that restricted state, you must take a PCR test (if this 72-hour timing coincides with Dec. 26th or 27th, then you're covered with the Binx saliva test you'll be mailing in). If it **DOESN'T** coincide with those dates, you'll need to take another PCR test **ON YOUR OWN** — and submit the results.

3

Then, upon arriving in New York, you must quarantine for 4 or 5 days and **THEN** take another test (and again submit a negative result, of course). After all **THREE** negative tests have been submitted, then you'd be cleared to return to the building.
