

Full Mouth Reconstruction:

A Periodontal and Prosthetic Approach to Comprehensive Patient Treatment

Transform the way you practice dentistry

- Confidently treat implant-supported and conventional FMR cases
- Seamlessly incorporate soft tissue management
- Unravel complex occlusal conditions
- Streamline treatment planning to optimize time and resources
- Provide comprehensive and personalized care to your patients

COURSE OVERVIEW

Learn to efficiently treat conventional and implant-supported Full Mouth Reconstruction cases. Our unique course format incorporates periodontal treatment, highlighting the critical role of soft tissue management in achieving ideal patient outcomes. This comprehensive approach lays the necessary groundwork for successful prosthetic restorations, promotes proper occlusion, and addresses optimal fit, function, and aesthetics. Expand your clinical skills to offer a wider range of treatment options and provide more effective and personalized care to your patients. A combination of patient treatment, lectures, case presentations, and guidance from seasoned faculty and dental technicians ensures a deeper understanding of the skills and concepts taught in this course.

Prosthodontics

- Sequence simple to complex prosthodontic treatment
- Fully and partially edentulous patient treatment
- Implant-supported prostheses
- Fixed and removable prostheses
- Materials selection for restorative treatment
- Occlusion
- Veneers

Periodontics

- Implant therapy
- Grafting procedures
- Guided bone regeneration
- Guided tissue regeneration
- Esthetic crown lengthening and gingival contouring

Treatment Planning

- Proper data and records collection
- Efficient treatment plan sequencing
- Streamline complex FMR cases
- Cone beam software utilization

Records and Documentation

- Facebow
- Articulation
- Bite registration
- Wax ups
- Photography

Interactive Course Format

- Live FMR patient treatment
- Case presentations, lectures, and group discussions
- One-on-one faculty and lab tech mentorship
- Assist and observe procedures performed by your peers and faculty

Tuition

- \$15,995 + \$950 registration fee (patient treatment option)
- \$9,900 (auditor option)

A payment plan is available for both options.

Schedule

32 sessions
Fridays, September – June
8:30 am – 12:00 noon: Clinic
12:15 pm – 1:30 pm: Study Session

Note: The first four sessions are full-day orientation sessions. The hours are approximately 9:00 am – 4:00 pm

CE Hours

Approximately 175 CE hours awarded

COURSE DIRECTORS

DR. JASON KIM

Dr. Jason Kim completed his periodontal training and received a Master's certificate from Rutgers School of Dental Medicine, Dept. of Periodontics. He previously served as Clinical Associate Professor at NYU College of Dentistry, CDE Implantology Program having served as Section and Surgical Director. He is also a Clinical Assistant Professor in the Dept. of PG Periodontics at Rutgers School of Dental Medicine. Dr. Kim was also appointed to Dean's Faculty at University of Maryland School of Dentistry. He is a Diplomate of the American Board of Periodontology, a Diplomate with the American Board of Oral Implantology, an Honored Fellow with the American Academy of Implant Dentistry, and also a Diplomate of the International Congress of Oral Implantologists. He served on the Board of Trustees with the AAID, and was also Past President for the Northeast District of the AAID. Dr. Kim is also on faculty for numerous AAID Maxicourses (New York, Las Vegas, Washington DC, Boston, Asia, UAE). He is Co-Founder and Co-Director of Manhattan Dental Implant Seminars and is in private practice in Flushing, NY. Dr. Kim lectures nationally and internationally in the field of dental implants, bone regeneration, biologics and guided surgery, among others.

DR. ZACHARY PAPADAKIS

Dr. Zachary Papadakis received his doctorate degree from New York University College of Dentistry in 1993. He immediately entered the postgraduate program in Prosthodontics and Occlusion and graduated as a Prosthodontist in 1995. In 1999 he completed the 2-year CDE course at NYU for the surgical and prosthetic treatment of dental implants. Dr. Papadakis is an Adjunct Clinical Assistant Professor in the Department of Prosthodontics at New York University and previously served in the CDE Implantology Program where he was the Prosthetic Director. He is also the Director of Dental Implants at Mount Sinai Hospital in New York City. Dr. Papadakis lectures nationally on implant dentistry as well as removable and fixed prosthodontics. He holds a Fellowship in the ICOI as well as the AGD. Dr. Papadakis maintains a private practice on the Upper East Side of Manhattan.
