IMPLANTOLOGY:

Surgical & Prosthetic Treatment

Patient Treatment Program

Hands-on patient treatment
Experienced & dedicated faculty
State-of-the-art facilities
The Longest Running Part-Time Program in the US

Our mission is to educate general practitioners in the science of implant dentistry

Enhance your skills in extraction, guided bone and soft tissue regeneration, and implant placement to support multiple types of fixture-assisted dental restorations, including screw-retained and cemented, fixed, and removable restorations. Learn to photograph and properly document cases. In addition to clinical treatment, you will attend group study sessions where you will observe and present case evaluations and be exposed to didactic lectures presented by seasoned clinicians who are on the cutting edge of implant surgery and restorations.

You will have the opportunity to bring cases from your private office for review and discussion. This program is clinically oriented and focuses on treatment planning. This is not a lecture course. General lectures are included to supplement your knowledge. However, participants are expected to understand the academic aspects of implant dentistry prior to enrollment. The goal of this course is to provide you with a basic skill set in a unique setting, which will ultimately be a means of increasing production in your private office.
Who Is This Program For?

General practitioners who want the foundational skills and knowledge to treatment plan and perform surgical & prosthetic implant procedures.

What Is The Length of the Program?

The program is 2 years from September 2019 to June 2021, based on the academic calendar. This allows enough time for you to follow a patient through every stage of treatment from consultation to restoration. You will learn how to manage implant complications to ensure long-term success — something weekend programs cannot prepare you for.

When Does the Program Meet?

There are 5 sections to choose from across Monday, Wednesday and Thursday. Choose 1 section.

What You Will Learn and Do:

- Diagnostic assessment and treatment planning for prosthetically driven implant therapy
- Atraumatic extraction technique
- Socket grafting and preservation
- Indications and techniques to use resorbable and/or non-resorbable barrier membrane(s)
- Submerged and non-submerged implant placement; perform second stage surgery under faculty supervision
- Basic surgical protocol including incision, flap design and suture techniques
- All phases of interim and definitive implant supported prosthesis, fixed or removable
- Implant site preparation including guided bone regeneration
- Immediate implant placement and immediate temporization
- Evaluate and treatment plan on CBCT image software
- Plan and perform guided implant surgery, when applicable
- Topic oriented textbook and literature review with weekly quizzes
- Case presentation and peer review
- Understand and observe sinus bone augmentation procedures
- Learn concepts and view ridge expansion and bone splitting augmentation surgery
- Study and observe block bone graft procedures
Program Benefits

- 1 cone beam software license for your personal laptop included in tuition for duration of program
- Attendance to our annual NYU/ICOI Implant Symposium
- CE hours count toward AGD Fellowship/Matership track awards and satisfy the surgical and prosthetic requirements to apply for ICOI Fellowship.
- Student discounts with Nobel Biocare, Zimmer Biomet, and Salvin
- Reduced tuition to eligible lecture-based Linhart Continuing Dental Education courses
- Expand your professional network and industry knowledge through informal discussions with fellow participants and faculty

New York State Dental License

You will need a New York State dental license in order to treat patients. Contact us for further details if necessary. You will need a full license, not a “limited permit.”

How Much Does the Program Cost?

For the 2019-2021 program, the tuition is $14,300 annually ($28,600 over the 2-year period). There is also an additional one time registration fee of $950.

Payment schedule per year is as follows:
- First Payment: $4,900
- Second Payment: $4,700
- Third Payment: $4,700

CREDIT HOURS: 200 annually
This course satisfies the surgical and prosthetic requirements to apply for Fellowship status in the ICOI.

Are Patients Provided?

Yes. The NYUCD Linhart Continuing Dental Education Program will provide four (4) patients for each participant for both surgical and prosthetic dental implant treatment.

What do You Need to Supply?

Participants are required to purchase the course textbook (approx. $200) and supply a laptop computer with windows or windows partition software for case presentations.

Visit the Program

See the program for yourself! Schedule a visit by calling 212.998.9757 or emailing dentalcde@nyu.edu. Observe a clinical and literature review session and speak with current participants and faculty to ensure the program is the right fit for you.
“I cannot begin to express how much this program did for me as a dentist, for my patients, and for my career. I consider myself very lucky for having the opportunity to have been a part of it and cannot recommend it highly enough!”

— Herbie Mendelson, DDS
Owings Mills, Maryland

“An amazing learning experience - you have the ability to learn both the surgical and restorative phases of implant dentistry. This course has made a great impact on my dental career.”

— George Diaz, DDS
Long Beach, NY
